

Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental, out station, Package type, hours/Days etc.

The screenshot shows a web browser window with the URL `creatorapp.zoho.in/shaikimrans1235.sse_saveetha/run-car#Form:User_Details`. The application is titled "Run Car" and has a sidebar menu with options: "User\_Details", "User\_Details Report", and "Select\_Car". The "User\_Details" form contains the following fields:

- Name: \* (First Name, Last Name)
- User\_ID: \*
- Phone: \* (+91, Phone: \*)
- Aadhar number: \*
- Email: \* (with email icon)
- Address: \*
- Place name: \*
- City / District: \*, State / Provin... \*
- Postal Code: \*, Country: \*

The user "Imran" is logged in, as indicated by the profile icon and name in the bottom left corner.

The screenshot shows the same web browser window with the URL `creatorapp.zoho.in/shaikimrans1235.sse_saveetha/run-car#Form:Select_Car`. The sidebar menu is updated to show "Select\_Car" as the active option. The "Select\_Car" form contains the following fields:

- Select the price range: \* (-Select-)
- Select car: \* (-Select-)
- Select rented date: \* (dd-MM-yyyy)
- Select return date: \* (dd-MM-yyyy)

At the bottom of the form are "Submit" and "Reset" buttons. The user "Imran" is still logged in.
